

WAHYU HIDAYATI

ELECTRONIC ENGINEERING

Phone: +6287737760090

Email: whyu.hida098@gmail.com

Address: Purworejo, Jawa Tengah, Indonesia

ABOUT ME

Graduate of Electronic Engineering from Semarang State Polytechnic with a focus on Industrial Automation, PLC Programming, Microcontrollers, and IoT Systems. Experienced in instrumentation, control systems, and industrial automation through academic projects and internship programs. Skilled in PLC programming, troubleshooting, calibration, and preventive maintenance of control systems. Highly disciplined, analytical, adaptable, and eager to contribute to industrial automation and power system projects.

EDUCATION

Semarang State Polytechnic | 2023 - 2026

Diploma III in Electronic Engineering / GPA 3.66/4.00

Focus: Industrial Automation, Instrumentation System, Sensor and Transducer, PLC Programming, Microcontrollers, IoT System

Public Vocational High School 1 Purworejo | 2020 - 2023

Electrical Installation Engineering

Focus: Electrical Installations, 3-Phase Motor Control, and Maintenance.

INTERNSHIP EXPERIENCE

PT KRAKATAU CHANDRA ENERGI | Sept 2025 - Des 2025

Instrumentation & Control Departement

- Monitored and maintained power plant instrumentation and control systems to ensure operational stability.
- Calibrated field instruments (pressure/temp transmitters) and performed loop testing and troubleshooting.
- Assisted in preventive maintenance of PLC-based control systems and actuators.

HOTEL LYNN BY HORISON YOGYAKARTA | Apr 2022 - Sept 2022

Engineering Departement

- Analyzed and resolved technical issues in AC, TV units, and facility electronic equipment.
- Performed routine maintenance and electrical repairs to ensure smooth operations.

ORGANIZATIONAL EXPERIENCE

UKM PENGEMBANGAN PENGETAHUAN POLINES

Staff of Education and Training Department

Managed administrative tasks for national scientific competitions and technical training classes (Robotics/IoT).

PROJECT EXPERIENCE

Water Level Monitoring System) - Semarang State Polytechnic (Course Project: Instrumentation)

Designed a water level monitoring system using ultrasonic sensors and performed data processing and analysis

Automatic Parking Gate and Information System (Course Project: computer-based control)

Designed an automated parking system for four-wheeled vehicles using infrared sensors and a microcontroller-based LCD to display available parking slots.

SKILLS & LANGUAGES

Hard Skills: Microcontroller Programming, PLC Programming, IoT System, Instrumentation & Calibration, Motor Control.

Soft Skills: Leadership, Teamwork, Analytical Thinking, Problem Solving, Technical Communication.

Software Skills: MS Word & Excel, Arduino IDE, CX-Programmer, Proteus.

Languages: Indonesian (Native/Fluent), English (Basic).

CERTIFICATIONS

BNSP Competency Certification (LSP Polines) - Professional Competency in Electronics Field.

Internship Certificates: PT Krakatau Chandra Energi & Hotel LYNN Yogyakarta.
